Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-8 are rejected under 35 U.S.C. 103(a) as being unpatentable over Fischell et al. (EP 0596172, cited from IDS) in view Siess et al. (US 2004/0044266).

Fischell discloses a device comprising a tubular channel 20 and a dilator 12; wherein the channel 20 has a wall thickness not larger than 0.06mm and is made from a hard plastic material; the inner diameter of channel is at least as large as the outer diameter of the dilator, (page 3, lines 25-37); wherein dilator and channel comprise a low-friction slip material, such as Teflon. A connecting device 30; the channel 20 comprises a distal end section which at least partly overlaps the distal portion of dilator 12. Fischell does not disclose that the dilator comprises a conical tip portion.

Siess discloses, Figs. 10, a device comprising: a tubular channel 37; a dilator 41 or 18 (Figs. 1-2, 12) comprises a conical tip 44

It would have been obvious at the time the invention was made to a person having ordinary skill in the art to modify the device of Fischell with a conical tip, as taught by Siess, in order to avoid damage to tissue and easier to penetrate and expander the tissues.
